3.cxd5 Nf6

[Instead, 3...Qxd5 4.Nf3 cxd4 5.Nc3 is the subject of our next game;]

[while 3...cxd4 4.Qa4+ Qd7 *(*Black comes up short after *4...Bd7 5.Qxd4;* or *4...b5 5.Qxd4)* 5.Qxd4 e6 6.Nc3 Nf6 7.e4 exd5 8.exd5 a6 9.Nf3 Bd6 10.Bd3 0-0 11.0-0 Qg4 was played in V.Mikhalevski-K.Landa, Ajaccio 2007, and here I believe White can obtain a clear advantage after the simple 12.Be3 .]

4.Nf3 I like this natural move because White gains a risk-free endgame.

[4.e4 is White's main option. He also has the advantage after Nxe4 5.dxc5 Nxc5 6.Nc3 e5 7.Nf3 , G.Timoshenko-G.Schroeter, Berlin 1997; *(*and here *7.b4 Nca6 8.a3* is also worth considering. *)*]

D06: Queen's Gambit: Symmetrical and Baltic Defences D06: Queen's Gambit: Symmetrical and Baltic Defences Browne,W: 'Inf 33/490' Craig Pritchett: '1908 was a good year for Rubinstein, during which among other successes he took on and defeated the American champion, Frank Marshall, 4½-3½, in a match in Warsaw. As Marshall had just lost a world title challenge match against Emanuel Lasker the previous year, though by a much larger 11½-3½ margin, this was particularly encouraging. --- Early in 1909 Rubinstein tied with Lasker to win the great St Petersburg tournament of that year. Both finished on 14½/18, a full 3½ points ahead of Duras and Spielmann tied in 3rd. Rubinstein deservedly defeated Lasker in their individual game and, given the emphatic nature of his achievement at St Petersburg, he now started to be taken seriously as Lasker's rightful challenger. --- It was not just Rubinstein's result that impressed in St Petersburg, but also the magisterial, yet apparently effortless way he played in his best games. At about this time Rubinstein was beginning to get a reputation as a particularly strong endgame player, but in fact his chess always had a much more universal quality. Rubinstein played the opening, middlegame and endgame with equivalent power and a mastery of strategy and tactics that was second to no one. --- In his game at St Petersburg against Jacques Mieses (1865-1954), a romantic of the old school, Rubinstein nursed a hard-earned opening edge through to a win in an outstanding endgame. Mieses' entry in The Oxford Companion to Chess attracts the unfair and certainly exaggerated comment that "he never assimilated the positional ideas of Steinitz and Tarrasch." Be that as it may, he certainly got a lesson in the art of playing classically direct chess in this game.' **1.d4 d5 2.c4 c5 3.cxd5 Nf6 4.Nf3 cxd4 5.Nxd4 Nxd5**

A useful general tip is that whatever opening you choose to play should be based on the following factors: 1) Do you like it? 2) Do you feel comfortable playing it? 3) Can you see good squares for all your pieces? 4) Do you like the typical pawn structures that result from your opening choice? 5) Is the opening sound or are there obvious defects? 6) Does the opening provide a solid platform with which to enter the middlegame? Of the six points above, the last one is probably the most important. The double Queen's Gambit with 2...c5 seems to fit that bill. [That day my opponent evidently didn't want to play a boring ending, which could appear after 6...Qxd4 7.Nxd4 a6 and after long thinking he preferred to continue the struggle with queens. Now comes the 'Double' Queen's Gambit. What is this, you ask? D06: Queen's Gambit: Symmetrical and Baltic Defences Now comes the 'Double' Queen's Gambit. What is this, you ask? **1.d4 d5 2.c4 c5** Here it is. I have before me a very interesting book by Alexey Bezgodov on this opening, recently published by 'New In Chess'. There are a lot of pages. Can there really be so much to say about this tricky line? It turns out that there is indeed plenty to say. The first impression is that if 2...c5 is so good, why isn't everyone playing it? The second thought is one of confusion. What do I do now?? In actual fact, 2...c5 is not a bad move at all. It was analysed by Haberditz and Muller a few decades ago and I seem to remember that grandmaster Heikki Westerinen liked to dabble with it on an occasional basis. O'Kelly de Galway was another fan. Among modern grandmasters Mamedyarov has played 2...c5. I think the truth is that 2...c5 is a very good surprise weapon, but that if White knows his stuff, he can oblige Black to be very careful just to stay on the board. Here it is. Fazit: Weiß bekommt insgesamt besseres Spiel...aber es gibt sicherlich heutzutage mit den modern Engines gute schwarze Remischancen(vielleicht auch bessere weiße Züge ?!).siehe Variante 11...- ♘xd2 ,bzw. "vielleicht" haltbare Stellung nach 36....- ♘xc5. Dennoch glaube ich das 2...- c5?! etwas zweifelhaft ist. Objektiv betrachtet entstehen sicherlich interessante Partien, die auffordern vielleicht ein Fernschach Thematurnier zu starten, um dieser Variante neue Hintergründe einzuhauchen.
